Hi Kimberly,

The organization is the Ag Container Recycling Council (ACRC) and the executive director is Mark Hudson. Phone: 877-952-2272 and email: mhudson@acrecycle.org.

For more information, see their web site: <https://www.acrecycle.org/home>. As you can tell, their focus is to collect and recycle used HDPE containers from the agricultural industry. They are funded by pesticide companies who pay dues in proportion to the amount of HDPE they put into the market each year. Mark will help you all to the extent that he can, but he may need to pull in the ACRC Board members or representatives from the pesticide companies if you have questions about the pesticide formulations themselves. But Mark is the right place to start.

Nancy

Subject: Container contacts?

Hi Nancy! Quick question: I'm understanding from Ed/Mike that a container industry group exists, and that you may have a contact name for that group. Could I get the name of that group and your contact person, if possible? As you know, BEAD's involved in the PFAS/container issue because of our Ft. Meade lab.

Thanks so much. I hope you're doing well!

Kimberly
